

# **University of Missouri**

## **Department of Radiology**

Fellowship:

### Pediatric Radiology Fellowship

The pediatric radiology fellowship is one year encompassing pediatric radiology from the neonate to the adolescent, both in the inpatient and outpatient setting. Training includes common pediatric imaging technical procedures and their indications, limitations, judicious utilization, and risks, including radiation dose considerations.

The trainee's time is divided as follows: three months of angiography, interventional radiology and neuroradiology; three months of NICU; three months of fluoroscopy and diagnostic radiology; and three months of body CT, MRI, ultrasound and nuclear medicine.

Nine of the one-month blocks will be spent at University of Missouri Health Care in Columbia, and three one-month blocks will be spent at Children's Mercy Hospital in Kansas City, Missouri.

### MRI Radiology Fellowship

Fellowships are offered by the Department of Radiology which can be tailored to fit individual educational goals. In past years, residents have successfully completed fellowships in general MRI and musculoskeletal radiology, in addition to the accredited fellowship in Pediatric Radiology.
